

# イーサリウムのテストネット（Rinkeby）のETH取得方法

## Rinkeby Authenticated Faucet

### How does this work?

This Ether faucet is running on the Rinkeby network. To prevent malicious actors from exhausting all available funds or accumulating enough Ether to request funds, requests are tied to common 3rd party social network accounts. Anyone having a Twitter, Google+ or Facebook account may request funds within the permitted limits.

- Twitter** To request funds via Twitter, make a **tweet** with your Ethereum address pasted into the contents (surrounding text doesn't matter). Copy-paste the **tweet's** URL into the above input box and fire away!
- Google+** To request funds via Google Plus, publish a new **public** post with your Ethereum address embedded into the content (surrounding text doesn't matter). Copy-paste the **posts** URL into the above input box and fire away!
- Facebook** To request funds via Facebook, publish a new **public** post with your Ethereum address embedded into the content (surrounding text doesn't matter). Copy-paste the **posts** URL into the above input box and fire away!

You can track the current pending requests below the input field to see how much you have to wait until your turn comes.

The faucet is running invisible reCaptcha protection against bots.
